GSA - GRENADA CITIZENSHIP BY INVESTMENT

Economic & Investment

ECONOMIC - Grenada has a largely tourism-based, small, open economy. Over the past two decades, the economy has shifted from one of agriculture-dominant into that of services-dominant, with tourism serving as the leading foreign currency earning sector.

INVESTMENT - This effort will require a total investment of around \$39 million. After discussions with the US Overseas Private Investment Corporation (OPIC), our goal is to combine \$20 million of investor (Government of Grenada and Principals) and CBI funds, and with up to \$19 million of OPIC financing, as required, to further compound the return for CBI investors. The proposed plan is tailored to produce a cash flow positive farm in three years, with a minimum return of 6%. Returns will vary somewhat based on the investment phase of the project.
